

Computer Science & Software Engineering

Junior Projects – Milestone 2

William Shoaff

Spring Semester – 2022

1 Assignment Goal

The goal of this assignment is to help you belong to a team either as a leader or a player. Google the terms “*team leader*” and “*team player*” to learn about these roles and get advice on *teamwork*.

In particular, for this course, learn how to use tools that support software development and collaboration. Here is a partial list of tools you may want to use.

- Discord Students have introduced me to [Discord](#) To quote from the discord site “*Whether you’re part of a school club, gaming group, worldwide art community, or just a handful of friends that want to spend time together, Discord makes it easy to talk every day and hang out more often.*” However, Discord does not directly support software development.
- Microsoft teams
Find resources to learn about *Microsoft Teams*. You can access Teams software through the [Florida Tech web site](#)
- GitHub is perhaps the default site for collaborative software development. [GitHub](#) You should be able to find resources to learn about *GitHub*.
- There are many other tools to help collaboration in the development of computer science/software engineering solutions to problems. If there is some you like let me know.

2 Tasks for this assignment

- Form a team of 2 or 3 students enrolled in this course. (A team of 4 may be allowed but must be justified and approved by the instructor wds@cs.fit.edu)

wds@cs.fit.edu.

Here is some advice on [forming a team](#).

- As a team, write a report following this outline:
 1. Your name
 2. Your teammates' names
 3. Did you consider using development tools other than ones mentioned above? If so, what were they?
 4. Describe the team work tool you and your teammates have decided to use. If there are multiple opinions, outline them.
 5. Why did you chose the soft development tool you plan to use in senior projects?

3 Submitting your report

Your report must be double-spaced, written using 12-point font, with 1-inch top, bottom, left & right margins, stored in PDF format, and submitted on the [Canvas Learning management system](#) . I expect each team member to submit the same report.
